

KleanSense IAQ Monitor

Advanced Sensor and Monitoring is a smart solution that measures indoor air quality, compares IAQ to external air quality indexes (AQI CH and AQI US) and automatically adjusts Clean Air equipment to provide the right level of purification of PM2.5, TVOCs, CO2 and temperature & humidity and pure, safe indoor air.

Description

- Independent air purification monitoring system
- Discrete, quiet and without maintenance requirements
- Wifi connection and APP & Web based monitoring software
- Includes PM2.5, PM10, TVOC, CO2, temperature and humidity standard sensors and formaldehyde and CO as optional.

Applications

Air quality monitoring is displayed on large screen TVs and made available to customers via URLs or an app with visualized interfaces. Clients and or employees can see a real-time display of indoor air quality through a phone, iPad, PC or TV.

Specifications

- Size : 135mm×135mm×40mm
- Weight : 320 g
- Working Temperature : 0~70 °C
- WIFI : Included
- Modbus : Optional
- Voltage : 100-240V 50/60 Hz

Installation

1. Remove protective packaging.
2. Remove unit from shipping carton.
3. Remove all protective materials.
4. Check for shipping damage and loose or broken parts.
5. Read owner's manual thoroughly prior to installation.
7. Connect to Power
8. Follow instructions for simple setup
